

Pigeon Control Dubai

How to Get Rid of Pigeons in Dubai — A Property Owner's Guide

Keyword: Pigeon Control Dubai

birdcontroldubai.com

The Pigeon Problem in Dubai

Pigeons are the most common pest bird in Dubai. With over 3 million residents and thousands of commercial buildings, the city provides pigeons with unlimited food, water, and nesting opportunities. Left uncontrolled, a pigeon problem doubles every 6 months.

Signs You Have a Pigeon Infestation

- ✓ Droppings accumulating on ledges, AC units or cars
- ✓ Cooing sounds coming from roof or ceiling voids
- ✓ Nest materials (twigs, feathers) visible on ledges
- ✓ Pigeons gathering in groups on your rooftop daily
- ✓ Foul smell from nesting areas
- ✓ Blocked gutters and drain pipes

Most Effective Pigeon Control Methods

Every property is different. Here are the top solutions used by Dubai's leading pigeon control specialists:

Bird Spikes

Installed on ledges & rooftops, prevents landing without harming birds.

Anti-Bird Netting

Creates a physical barrier — 100% exclusion from balconies & courtyards.

Bird Wire System

Stainless steel wires create instability for landing birds. Nearly invisible.

Pigeon Trapping

Humane cage trapping and relocation for severe infestations.

Habitat Modification

Removing food/water sources and sealing entry points.
